The MT 2020 has proven excellent print quality at top speeds with nearly any material , paper, cardboard, scratch sensitive material , from 100 gsm up to 50 mm thick material or flexible banner, practically all material used in a modern print shop for supplying display products, pop` s , posters and much more.

M&W MT 2020 in short :

- MT 2020 is a high quality industrial and graphic multi color line with servo driven light weight moving tables.
- INFEED and LOADING , it is supplied with adjustable 3 point registration guide, left and right side location for double-sided work.
- PRINTING HEAD Four post design with heavy duty linear bearing lifting columns allows a high lift position for easy screen cleaning and print inspection.
- SQUEEGEE and FLOOD BAR running on precision linear bearings, direct drive system with servo motors.
- REGISTRATION , advanced registration control system. Accurate stepper motors allow even finest adjustment in X-Y-Z and skewing.
- PEEL OFF , synchro print is adjustable from the touch control panel for the rate of peel and the starting point.
- UV ECO PLUS, 0 - 150 W/cm stepless adjustable, it saves up to 50 % of electrical power , no heat emission to the material , practically no material shrinking.
- JOB COMPLETION , the tear down button will allow the operator to select all heads or an individual print head to be positioned and unlocked for quick screen change or tear down after the job has been completed.
